

PROTOTYPING SET

SCRIPTED PLAYING DOMINOES DOUBLE 18s

WHITE & RED SKULLS ON FRACTAL -02 FACES & SPIRT BACKS

NOTE:

THIS IS A PROTOTYPE PACKAGE.

These dominoes are prim blocks with textures and connecting script applied. Textures are by AJ Leibengeist and scripts are by Teddy Tobias.

FEATURES

The package includes the following.

- A Deployer Box that will rez the 190 dominoes for play
- The script in each domino uses 64Kb of memory
- A set of copy only Domino Stands to align hand with for play
- A Setup Instructions book
- HUD for the PDF, Marketplace, and Landmark
- A Catalog Scrapbook for other domino products

Each domino is a 1 LI prim. The entire set of 190 dominoes is 190 LI and 12,160Kb of memory. The Deployer will rez all the bones to the right and top of its position (note the arrows on the Deployer). Bones will rez face down and are named BONE ## with ## being a number for the bone. They are not numbered in order or sequentially. After the bones are all rezzed, you can delete the Deployer or leave it out to rez the next round.

The dominoes are set so “anyone” can move them. If not, select all the dominoes and check the box so anyone can move them.

Give or share a copy of the Domino Stands to the other players. You can share the Setup Instructions too.

These dominoes have a connection script to position in play from the Domino Stands to the bones in play. All other movements and functions are done with the player’s editing tool. Score keeping is done by the players as well. Refer to the Domino Setup Instructions book for setup and playing information.

UNPACKING

CasperVend items come in a Mesh Crate and will probably show up in your Objects Folder. You'll need to rez or wear the delivery crate for it to open and copy to your inventory. The same crate is delivered by the SL Marketplace. It will go to your Received Items Folder. The Front label on the crate will provide a menu for the label(s), information images, TCGWS logo and a blank transparency to see the image on the crate.
