

Full Permission Wall Textures Molding Rail and Board Sets v.01

These are transparent overlays (png file formate at upload) for walls. They are sets of moldings and paneling. Molding rails include the Crown, Picture, Chair and Skirting.

These Panels are created from RL material I've used for projects. Images are edited to be to be repeating textures.

Woods are sanded smoothed for plain images and converted to squares. One image is edited to be repeating and seamless.

Fractal burning is done one items, cleaned and reimaged for digital work. Other packages have images from each step. Fractal burns may be filled with a color and reimaged.

The textures used for Trims are created from stock images to be repeating seamless.

I have a few different boards and rails that are included as an additoinal box. It and the Image 0 will give you some freedom to modify the textures to your liking.

The Texture Gallery will have more displays and a HUD and Wall display that allow you to view the textures with separate rails and boards.

UNPACKING CASPERVEND

CasperVend items come in a box and will probably show up in your Objects Folder. You'll need to rez the box and open it to copy to your inventory. Since there are no copy permissions, you'll get a message that they have to move to inventory. There is a Sandbox on the Milda shops.

Markerplace purchases most likely will not be boxed and can be viewed in the contents tab on the product page. Those items will go to your Received Items Folder in your Inventory. Items with no copy permissions, will move in and out of inventory as you rez them and take them back.
