

HUD BOOK, SPACE STATIONS IN SL (copy only or transfer only)

NOTE:

This Book comes packaged in a ball. There are two books inside, open and copy to inventory. One book has the first half of the set and the second one has the last half. The Book contains Images only. The locations of the stations are indicated on the page label.

You can rez the book inworld to use or wear it as a HUD.

This book comes as a Copy Only (rx) and a Transfer Only (tx) version. Note the “rx” or “tx” at the end of the SKU.

There are 93 stations split between the two books. Pages designed for a two-page layout. The first four set of pages show how to use the book, list the contents, and provide a basic main continent and world map. Landmarks are from the GTFO (Get the Freight Out) group, IVE (Iris Virtual Enterprises), and other supplied locations.

I'm in the third year of creating my inworld presence. Still a lot of work to do. The space stations of TCGWS are built by Iris Herouin. You can find her office on SSTC (Space Station Thunderchild) in Milda. I plan to officially update these book about every one to two years depending on the number of changes.

The Station pages are a photo of the station, dock or area. The title is in the upper left corner. It notes the Continent – Region – Station or Parcel Name – Altitude in meters. Two icons will indicate if the site is isolated from the mainland and if there are teleport restrictions.
