

AJTG, Demo Crates and HUDs

NOTE:

This document covers the general use of the demo targets and their HUDs.

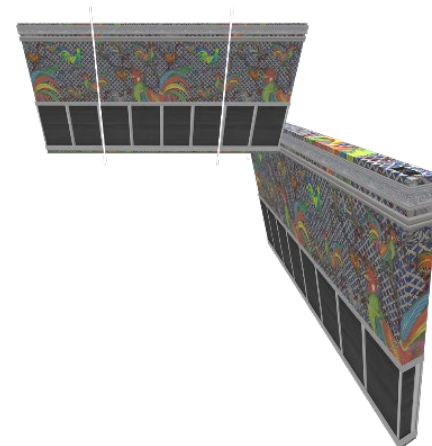

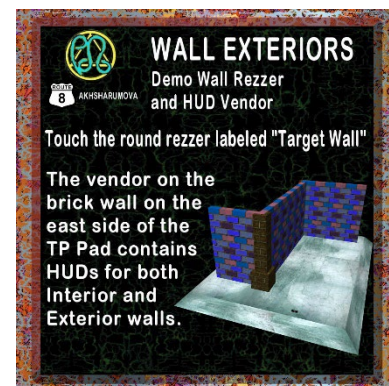

Not all demos are available outside the store. Some of the targets can be large.

At the Store, the Demo targets are rezzed by touching the Kool Rezzer Button marked on the stand in that area. There are yellow and black stripes marked on the floor where the rezzer will place the target. A safe zone to stand in when rezzing may be marked in similar green stripes.

For demos received off the Second Life Marketplace or through CasperVend, you will need a location to rez the target to the ground. TCGWS has public rez zones and sandbox with free group membership.

One Target will work with several demo HUDs. The targets and HUDs generally have a one-to-two-day life span.

The HUDs are FREE and available via Casper Vendors inworld and on the SL Marketplace. In the store, there will be a vendor with the associated HUDs for the targets in that area's demos.

FEATURES

- Free and available in store or for home.
- Allow for the views of textures on model builds.
- Home use versions have a limited life span.

TOS

My general TOS comes with products. A complete listing of my TOS in PDF can be found at

<http://sl.thunderchild.net/doc/TCGWS-TOS.pdf>.

Refer to the Second Life Terms of Service

<https://www.lindenlab.com/legal/second-life-terms-and-conditions>.

UNPACKING

New version of Items come in a crate with a label on one side. The label changes on touch and has the product label, a blank, and any information that applies. The products are transfer only and have a timer delete script. The crate is general for keeps. Some items will come unpackaged. These items sku end in a ",rx".

CasperVend items will probably show up in your Objects Folder. You'll need to rez the box and open it to rez directly to the floor or move to your inventory. The same type of box is also delivered by SL Marketplace, and it will go to your Received Items Folder in your Inventory.
