

## Touch for Location Orb

### NOTE:

These are simple prim orbs with two scripts. One scrip is for the flashing red light and the other is for the location.

Simply drop or rez the orb and position it where you want it. Touch the orb and it will give you the location in nearby chat. The location is in comma separated X, Y, Z, coordinates with 5-digit decimal accuracy.

Example:

Location 5-digits: <220.89070, 119.44760, 57.02562>

You can also attach the orb to your hand or other body part and move around touching the orb for the current location.

These are the non-temporary orbs. They will remain in sport until returned or deleted.

The orbs come in four textures individually. They come unpackaged and ready to use.
