

Photo Tour of TCGWS Sites

Figure 1: TCGWS has three locations along Route 8 in the north end of the continent. Bear of Boogie Land and the Sandbox are located in Triasm at the west end of Route 8. TCGWS main site is located a few regions east in Milda. AJ's Texture Gallery is located farther east in Akhsharumova.

TRIASM REGION

Bear of Boogie land has two parcels. One is a sandbox with games on the ground level and three sky platform sets for sandbox working spaces.

The ground level has games and scenes that can be rezzed and used.

The Stage and fishing hole are on the east side of the region. The stage/fishing hole is opened and closed from a level. There is ample seating for any activities. A garden is available for use as well as a small games room below the garden. A landing platform can be used for airships or set up for other functions.

A small asteroid space station is located at 3800 meters above the sandbox. It can accommodate two small shop and provides over night facilities for a small crew.

MILDA REGION

The main site is in the Milda Region. This is where artwork, clothing, objects, and other products are displayed and available for purchase. AJ's apartment is in the same building as the office.

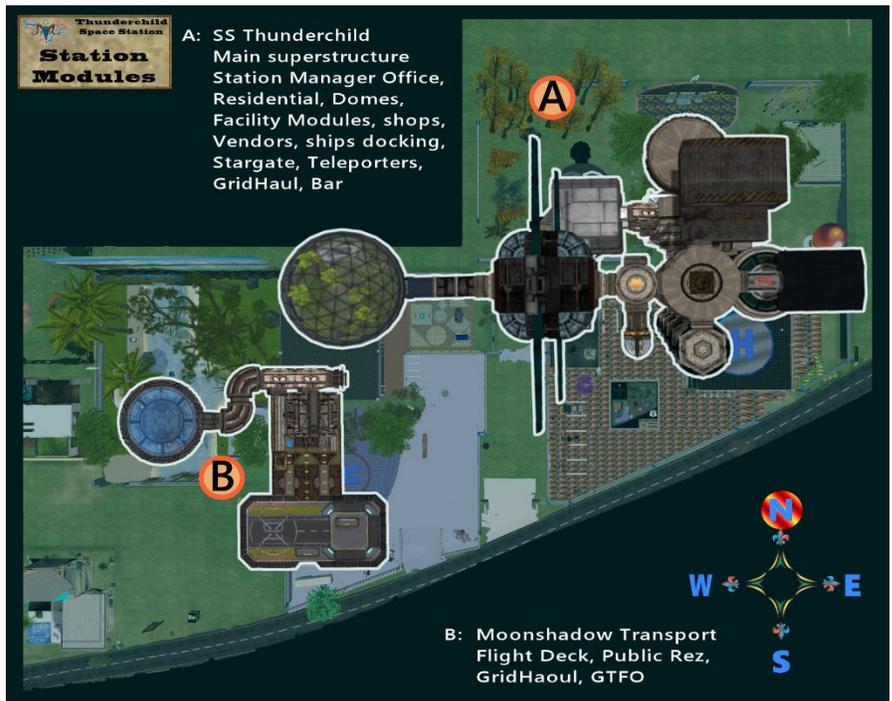

There are available games and rides for general use. A large park is located on the west side and can be used for public or private events. The backyard can also be used for events. In fact, most any of the areas can be used for events space. Contact AJ or other staff member with questions or for help.

Moonshadow Transportation is a separate parcel and hosts both Grid Haul and GTFO games. Offices for Moonshadow and KOCK.rocks BiPolar Radio are connected to the truck area.

Space Station Thunderchild (SSTC) is located in the Milda Region at 3,800 meters. There are two sections to the station, the main section with residential and station facilities and the Moonshadow section.

Iris Herouin is the manager of the space station. She also runs tour services and has an office on level two of the station.

AKHSHARUMOVA REGION

AJ's Texture Gallery is east of the Milda region. It is the site for full permission textures produced and used at TCGWS. The entrance is roadside and has a portal door to get you to the gallery or you can use the hoverboards or collision teleport wall with your call, provided it has the script for it.
