UNPACKING

The Starter Kits and the All-Models Demo come in crates. CasperVend items will show up in your Objects Folder. You'll need to rez the delivery box for it to open it and copy to your inventory. The same box is also delivered by the SL Marketplace. It will go to your Received Items Folder in your Inventory.

HUD & USE

The HUD system I use is by Creative Designs. The HUD and clothing work on a channel number, Similar clothing lines will have the same channel number. All Women's Oversized T-Shirts by White Canvas with the SKU ovrzsht,wc1 are on the same channel and can be used with all the sets of HUDs for this shirt. The HUD provides control for color tinting, shininess, glow, alpha, texture and bright for the clothing.

The notecard and Image icons on the HUD will give information on the HUD use.

Once you've added the clothing to what you are wearing, double click on the HUD to attach it to the screen. You can move it around using the editing tools. Hit the open/close button to close and reopen it so the scripts have all reset.

You will need to touch the shirt button and then touch the select texture button. This ensures the clothing is selected.

You can now play with the other sections. The Color tinting will apply a color to the clothing. The sizing buttons will change the overall size of the clothing to a certain degree. The eye on the Alpha row, will make the clothing transparent. The Red Xs will cancel any one of the alterations.

The Info & RL Links provide information and landmarks for inworld sites. The HUD label will open the SL Marketplace page and the URL PDF will open the current PDF file from SL.Thunderchild.net.
