

TEXTURE PACK FRAME MATERIALS

PRODUCT FEATURES:

Scanned Image Textures for Testing
Digitally edited Image Textures for Testing
Multiple textures samples

Information:

THESE ARE SAMPLES TEXTURE IMAGE SAMPLE.S

31 images, each with one of the textures available for frames, doors and other surfaces/faces. The Fractal burned wood is done by AJ. A small block sample of wood is sanded smooth and raw. The clock is scanned and photo shot. One or both sides are then fractal burned (Liechtenstein etching), cleaned and then imaged again. The burned cuts in the wood are then filled with a color or material, then imaged. Lastly, it is finished with a topcoat and imaged one last time.

The images are high resolutions, after playing with the images and saving various results, 2048x2048, 2048x1024 pixel or other ratios are saved and uploaded for inventory.

If you have a request for a specific wood etching with colors, please let me know and I'll get you a quote. Request include full perms images in-World and an RL high resolution image set.

Boxes of 32 Texture Images (Modify, Transfer) for use are available in separate boxes and at the in-World Stores. Search for the Image Name.

You can have a frame texture out of any image. Here are the ones I have and use as of June 2020.

LIST OF IMAGES

Canvas Base No.5
Burnt End Blue
Burnt end bud
Canvas Beige
Canvas Black White
Canvas Dark Gray5
Canvas Default Negative
